

Relationship Between Water Resources and Land Use Planning

Drew Kleis
City of San Diego Storm Water Department
April 7, 2010

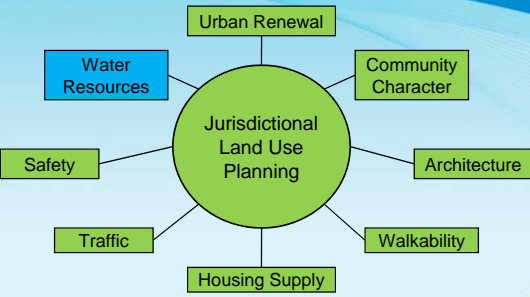

Presentation Overview

1. Review current land use planning processes
2. Resource and land use planning connection
3. Considerations/Recommendations:
 - ✓ Use existing land use planning processes
 - ✓ Improve communication with land use planning
 - ✓ Increase participation across water resource issues

Local Land Use Planning

```
graph TD; J[Jurisdictional Land Use Planning] --- UR[Urban Renewal]; J --- CC[Community Character]; J --- ARCH[Architecture]; J --- W[Walkability]; J --- HS[Housing Supply]; J --- TR[Traffic]; J --- S[Safety]; J --- WR[Water Resources]
```

Resource & Land Use Planning Connection

1. Resource planning lends itself to watershed (or other cross-jurisdictional) approaches
2. Land use planning is a local decision
3. Improve mechanisms for info sharing, participation
